-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 2, 4 and 5 have been considered but are moot in view of the new ground(s) of rejection.

Despite applicant's disagreement, the examiner decides to provide new rejection as below. Other references have been incorporated to strengthen the examiner's position with respect to the computer-readable medium containing programming instructions for controlling brightness from a display unit.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hawthorne et al. (U.S. Patent 5,764,209)

Regarding claims 1 and 4, Hawthorne et al. discloses a computer-readable medium (10, see figure 1) and its method containing programming instructions (column 5, lines 52-53) for controlling brightness from a display unit (11, column 5, line 8), the programming instructions comprising:

calculating a display brightness in a certain window (LCD) displayed on a screen of said display unit (11), see column 5, lines 52-55; and

controlling (64, see figure 2) said display unit so as to change said brightness of said display unit (by a filter 23) according to said calculated display brightness.

Regarding claim 2, Ishida discloses the computer-readable medium (Figs. 3-9), the programming instructions further comprising: using a power management function for controlling said display unit so as to change said screen brightness of said display unit (Figs. 3-9, col. 1, lines 60-67. col. 2, lines 1-15, Claim 18).

Regarding claims 2 and 5, Hawthorne discloses the programming instructions and its method further comprising: using a power management function (the power management function including a display panel drivers 40 and conductors 41) for controlling said display unit so as to change said screen brightness of said display unit (column 5, lines 27-33).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakata and Nakajima disclose related art.
